RE: REACH 211 SVHC's Compliance

The REACH Regulation, EC 1907/2006, of the European Parliament went into effect June 1, 2007. REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a system for controlling chemicals in Europe. The regulation places the responsibility on industry to manage the risks from chemicals and to provide safety information on the substances.

An integral part of REACH is the Candidate List of "Substances of Very High Concern" (SVHC). The process is to target these SVHCs for replacement by less dangerous substances or technologies where feasible alternatives are available. The latest list was published on **January 19, 2021** and currently has 211 **SVHC's**. This list can be found on the ECHA website, www.echa.europa.eu/candidate-list-table and is included at the end of this document for reference.

Backer Hotwatt has thoroughly evaluated all our raw materials, process materials and products. To the best of our knowledge, they do not contain any substances included on the **REACH 211 SVHC** list in a concentration in excess of the specified threshold limits. We continue to work with our suppliers of raw materials to ensure they have also evaluated and communicated information regarding changes and the presence of SVHC's in their products.

Backer Hotwatt monitors the ECHA website to obtain the latest information regarding any changes or additions to the REACH regulation and/or SVHC list. We will take necessary action to provide notification to our customer base if any relevant changes occur that would require further action.

If you have any questions regarding this information, please do not hesitate to contact us.

Sincerely,
